TECHNICAL CHARACTERISTIC

- Ø **Chassis:** Self-supporting anti-corrosion Aluminium structure.
- Ø **Axles:** fix, single, 9000 Kg capacity, 1st axle liftable.
- Ø **Steering:** 3rd axle with forced steering managed by the truck fifth-wheel and mechanically controlled.
- Ø **Brakes:** disc Ø 430 mm.
- Ø **Braking system:** pneumatic with two lines according to ECE R13-11 with Electronic Braking System (EBS) and RSS.
- Ø **Suspensions:** pneumatic type with electronic control.
- Ø **Wheels:** disc 22.5 x 11.75 - M spigot.
- Ø **Tyres:** 385/65R22.5 or 385/55R22.5 160 J single.
- Ø **Accessories:** 2" King Pin in accordance with EEC standards demountable from below; 24 t landing legs with two speed and rocking feet; spare wheel carrier; side guards; mudguards; wheel chock; tool box.
- Ø **Body:** box unit for live stock transport with 2 or 3 or 4 loading deck; insulated and liftable roof; internal working lights and fan system.
- Ø **Rear loading bridge:** hydraulically controlled, anti-slip, with incorporated side guards and working as barn doors if necessary.
- Ø **Electrohydraulic system:** autonomous type with electro-pump and high capacity batteries, completed with automatic safety device in accordance with Machines Directive and Work Safety Institute.
- Ø **Drinking system:** automatic type with nipples for pigs and water tank 400 l.
- Ø **Ventilation system:** autonomous with 15 side fans Ø 255 mm. Total max. flow 19500 m³/h
- Ø **Partition gates:** aluminium swinging or foldable type.

OPTIONAL

- Ø Independent movement for loading floor
- Ø Rear loading bridge with hydraulic movement
- Ø Positioning GPS system integrated with temperature and opening doors recording.
